>>>> APA

The APA allows for both manual hand-application to spot treat high contact surfaces and remote-head fogging. This accessory plugs directly into the RDS using our simple ADP connector. The APA comes with a spray gun attached to a 25' cable for maximum coverage.

Mounted on optional tripod

For use with RDS

Hand-application is ideal for:

- Exterior settings
- Individual pieces of equipment
- Quick spot-treatment on high contact surfaces

Remote-head fogging is ideal for:

- Expanding the treatment footprint of AeroClave systems
- Fogging in small areas
- Fogging in irregularly-shaped areas

STANDARD FEATURES

Nozzle: Brass

Spray Pattern: Up to 10" diameter

Spray Distance: 7' to 8' length

Max. Flow: 1800 ml/h

Hose Length: 25 ft

Connection: Using ADP connector on RDS

Tripod Mounting: Standard photographic thread

Remote Switch: Automatically engaged by tripod

Note: Tripod is not included

APA in Action

The APA applying disinfectant to ambulance exterior and cab

Two APAs used as remote heads in a classroom

RDS Trident disinfecting the dayroom at a fire station

Decontaminating an entire kitchen in minutes with 3 APAs running off a single RDS Trident

Using the APA and RDS 3110 to spot-treat a stretcher back at the station

The APA allows athletic equipment to be disinfected by hand
